

VACANCY

Job title:	ICT Systems Administrator
Department:	ICT Support
Advert closing date	30 November 2025
Location:	Waverly Office Park, Bramley, Sandton
Reports to:	ICT Manager

JOB PURPOSE

At SkX Protiviti, we rely on our IT systems to help our business reach and succeed with our clients. We're seeking an experienced systems administrator who's eager to use and grow his or her technological skills. In this role, the successful individual will protect our critical information, systems, and assets, install new software and hardware, provide training, and assist in the execution of an overall ICT strategy. From early on, you'll be given challenging assignments, lead initiatives, and take ownership and responsibility. And, you'll receive training to help you become a leader in your field. Our ideal candidate will be passionate about applying their skills to a technology-based business model and stands out with his or her attitude to drive ICT support forward as a punctual person.

OBJECTIVES OF THIS ROLE

- Maintain essential IT operations, including operating systems, security tools, applications, servers, email systems, laptops, desktops, software, and hardware
- Own individual and team projects when applicable, solutions are driven, and key responsibilities within a larger business initiative
- Handle business-critical IT tasks and systems that support the firm at an enterprise level.
- Implement analytics for meaningful insights within the team specifically around support measures and trends.
- Nurture dependable IT infrastructure and networking that's always up and running with internal team and external service providers.
- Partner with internal and external partners to communicate support feedback, project status, activities, and achievements
- Adapt to business changing requirements; Adhoc after-hours calls and weekend work when necessary.

DAILY AND MONTHLY RESPONSIBILITIES

- Perform server administration tasks, including user/group administration, security permissions, group policies, print services, research event log warnings and errors, and resource monitoring, ensuring system architecture components work together seamlessly
- Monitor datacenter health using pre-existing management tools and respond to hardware issues as they arise; help build, test, and maintain new servers as needed
- Maintain internal infrastructure requirements including, laptop and desktop computers, servers, routers, switches, firewalls, printers, phones, security updates; support internet, intranet, LANs, SD/WANs, and network segments
- Mobile device management (Phones, Ipads..),
- Interact with the help desk and other teams to assist in troubleshooting, identify root causes, and provide technical support when needed
- Perform routine/scheduled supporting audits of the systems
- Remote support and
- 3g data management tools monitoring

SKILLS AND QUALIFICATIONS

- Bachelor's degree in technology or computer science
- Proven work experience in ICT with a minimum 3 years
- Experience with or knowledge of operating systems and not limited to; current equipment and technologies, enterprise backup and recovery procedures, system performance-monitoring tools, active directories, virtualization, HTTP traffic, content delivery, MS Azure, Exchange, Office 365, Windows, Mac OS
- Experience in project management, infrastructure support, integration, migration and cloud computing (specifically Microsoft Azure)
- A+, N+ , MCSE, CCNA, ITIL V3

Preferred additional qualifications

- Professional certifications ;
 - o AZ-104: Microsoft Azure Administrator.
 - o AZ-900: Microsoft Azure Fundamentals.
 - o AZ-500: Microsoft Azure Security Technologies.

Applicants are requested to apply for this position if they meet the minimum requirements of the role.
